

Beacon Commodities

Michael in a flowering coriander field.

Drying lemon peels.

Beacon Commodities source, import, store and distribute a wide range of gin botanicals across the globe.

Juniper bush.

Combine for coriander seed.

Beacon Commodities have trading links dating back centuries and continue to expand their lists of suppliers to bring the best quality botanicals to gin distillers across the globe.

Beacon Commodities supply a vast range of distilleries. These include major brands to the explosion of craft distilleries that are opening up in the UK and around the world.

The father and son team travel extensively throughout the world to maintain and inspect their sources of supply. The extensive travel also enables Beacon Commodities to check harvests, open up new trading links and invest in joint ventures across the globe and within the UK.

Beacon Commodities hold stock of the key gin botanicals in a specifically designed spice warehouse within the UK where their botanicals are inspected, repackaged and processed if required. Some of these botanicals include;

Juniper, Coriander, Angelica Root, Orris Root, Lemon Peel, Sweet Orange Peel, Bitter Orange Peel, Licorice Root Powder, Cassia, Cinnamon and Cardamom.

Beacon Commodities can supply distillers with their full recipe, their core ingredients or one-off botanicals giving distillers a flexibility of supply.

Angelica root.

Coriander being harvested.

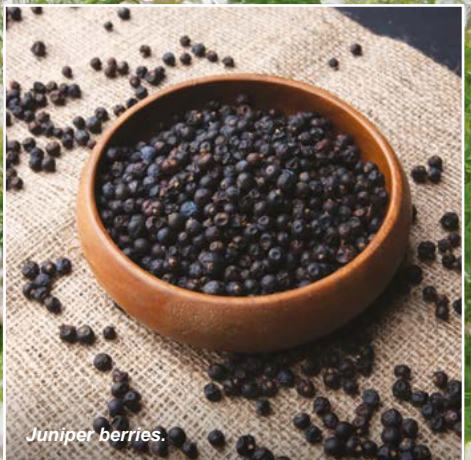

Sweet orange peel.

Lemon peel.

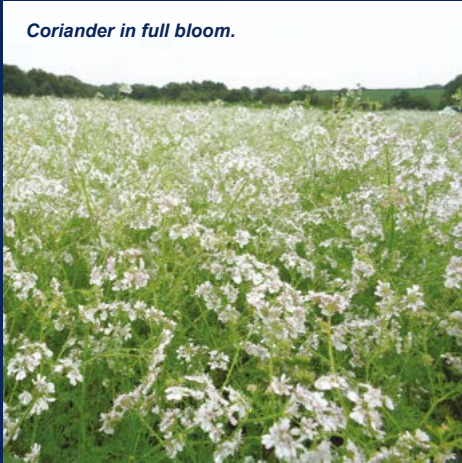

Coriander seed.

Juniper berries.

Coriander in full bloom.

Tommy inspecting a Moroccan coriander crop.

A successful juniper harvest.

Bitter oranges.
